

Clinical Trial Assistant (Industry Placement) Candidate Information

March 2023

The Institute of Cancer Research

About our organisation

We are one of the world's most influential cancer research institutes with an outstanding record of achievement dating back more than 100 years. We are world leaders in identifying cancer genes, discovering cancer drugs and developing precision radiotherapy. Together with our hospital partner The Royal Marsden, we are rated in the top four centres for cancer research and treatment worldwide.

As well as being a world-class institute, we are a college of the University of London. We came top in the league table of university research quality compiled from the Research Excellence Framework (REF 2014).

We have charitable status and rely on support from partner organisations, charities, donors and the general public.

We have more than 1000 staff and postgraduate students across three sites – in Chelsea and Sutton.

The Clinical Trials and Statistic Unit (ICR-CTSU)

The ICR-CTSU is an internationally recognised cancer clinical trials unit (CTU), led by Professor Judith Bliss, with over 30 years' experience in the design, conduct and analysis of cancer clinical trials. ICR-CTSU receives programmatic core funding from Cancer Research UK, is a UK Clinical Research Collaborative registered CTU and is one of fifteen CTUs recognised by the UK National Cancer Research Institute for a professional specialism in the development and delivery of cancer trials.

ICR-CTSU's strategic vision is to enact pull-through of world-leading science from ICR and elsewhere into patient benefit via high quality and efficient cutting-edge trials of smarter, kinder treatments that will ultimately translate into patient benefit internationally. Our main interests and areas of expertise are the evaluation of new drug treatments and technologies (including radiotherapy) and the use of biomarker-driven designs to clinically qualify putative predictive biomarkers and evaluate targeted

Clinical Trial Assistant (industry placement)

Candidate Information

treatments. Our portfolio includes innovative, efficient and adaptive trial platforms and early phase trials. We have a large network of collaborations within the clinical and academic community and with the pharmaceutical industry.

Our portfolio of national and international phase II and III trials prioritises activity in three clinical and therapeutic domains:

- Breast and rare cancers trials
- Radiotherapy, urology and head and neck cancer trials
- Early phase and adaptive trial designs

These priority areas are supported by a cross-cutting biomarker and genomic analysis theme. This theme facilitates interrogation of the wealth of emerging trial data and focuses on the integration and translation of novel diagnostic, prognostic and therapeutic strategies into clinically relevant biomarker driven trial designs. We also manage an expanding number of early phase I/II cancer trials in collaboration with the Drug Development Unit, a joint unit of ICR and The Royal Marsden NHS Foundation Trust and a leading phase I unit globally.

Some highlights which demonstrate the breadth and impact of our portfolio include: In women with advanced triple negative breast cancer our TNT trial has demonstrated that those with an inherited BRCA mutation were twice as likely to benefit from carboplatin as the current standard of care ([Nat Med. 2018 May;24\(5\):628-637](#)) and is set to change practice internationally. Our TOPARP study led to FDA Breakthrough Designation of olaparib for advanced prostate cancers with BRCA and other DNA repair defects and has catalysed development of molecularly stratified treatment strategies for prostate cancer ([N Engl J Med 2015; 373\(18\) 1697-708; ASCO 2019](#)). The FAST-FORWARD trial provides evidence that a one-week course of radiotherapy in fewer but larger daily doses is as safe as the standard three-week therapy for women following surgery for early stage breast cancer ([Lancet 2020 395\(10237\): 1613-1626](#)) and is the most recent of our long-standing portfolio of phase III radiotherapy trials to report practice changing results.

We are a multi-disciplinary CTU, which comprises more than 90 staff including statisticians/trial methodologists, clinical trials programme managers, trial managers, data managers, research IT programmers and administrative support staff. We have over 75 multi-centre trials on our portfolio which are in set up, open to recruitment, or in active or long-term follow-up, with access to further closed trials. Our senior management team hold leadership roles shaping clinical research at the local, national and international level.

Candidate Information

Our values

The ICR has a highly skilled and committed workforce, with a wide variety of roles, each requiring different skills. But whether you work as a researcher, or work as part of our corporate team, your work and behaviour is underpinned by these six values. They are what bring us together as one team - as 'One ICR'.

Pursuing excellence

We aspire to excellence in everything we do, and aim to be leaders in our field.

Acting with Integrity

We promote an open and honest environment that gives credit and acknowledges mistakes, so that our actions stand up to scrutiny.

Valuing all our people

We value the contribution of all our people, help them reach their full potential, and treat everyone with kindness and respect.

Working together

We collaborate with colleagues and partners to bring together different skills, resources and perspectives.

Leading innovation

We do things differently in ways that no one else has done before, and share the expertise and learning we gain.

Making a difference

We all play our part, doing a little bit more, a little bit better, to help improve the lives of people with cancer.

Our values set out how each of us at the ICR, works together to meet our mission – to make the discoveries that defeat cancer.

They summarise our desired behaviours, attitudes and culture – how we value one another and how we take pride in the work we do, to deliver impact for people with cancer and their loved ones.”

Professor Kristian Helin
Chief Executive

Clinical Trial Assistant (Industry Placement)

Candidate Information

Job description

Department / division:	ICR-CTSU, Division of Clinical Studies
Pay grade / staff group:	Work placement, salary £11.05 per hour (£20,166 per annum)
Hours / duration:	Full time (35 hours per week), Monday to Friday. Fixed term contract for 9 - 12 months
Reports to:	Senior Data Manager/ (Senior) Trial Manager
Main purpose of the job:	To support the ICR-CTSU in the delivery of their investigator-initiated phase II/III clinical trials by providing data management and administrative support to trial & data managers and trial administrators for a number of multicentre randomised controlled trials of cancer treatments. The post holder will work closely with members of the ICR-CTSU trial team including trial & data managers, trial statisticians and trial administrators.

Duties and responsibilities:

Management of data and samples

Enter and review clinical data on clinical study databases.
Perform data checking and cleaning.
Raise data queries, and liaise with centres to resolve them.
Chase outstanding data and biological samples from hospitals.
Log and monitor return of case report forms (CRFs) and queries, escalating any issues as appropriate.
Log, monitor and reconcile biological sample collection between participating hospitals and central laboratories.
Draft summary reports to assist the Trial Manager and Statistician in oversight of trial data.
Assist the trial team to provide study-specific data management training for research teams at participating hospitals.

Clinical Trial Assistant (Industry Placement)

Candidate Information

Request screening log data from sites, query as required and enter data.

Administrative Duties

Assist with the maintenance of record management systems for all trial material, including patient data.

Assist in preparation and/or maintaining up to date trial related documentation such as Trial Master and Site Investigator Files

Prepare and distribute trial supplies e.g. sample collection kits

Assist in the processing of trial correspondence.

Deal with relevant telephone queries about the trial(s) as necessary.

Take and draft minutes of meetings as required

Organise meetings for the trial team

General

Attend and contribute to team meetings (Unit and Trial level) and Trial Manager/Data Manager meetings

Support trial teams in study closure

All staff must ensure that they familiarise themselves with and adhere to any ICR policies that are relevant to their work and that all personal and sensitive personal data is treated with the utmost confidentiality and in line with the General Data Protection Regulations

Any other duties that are consistent with the nature and grade of the post that may be required.

To work in accordance with the ICR's Values.

To promote a safe, healthy and fair environment for people to work, where bullying and harassment will not be tolerated.

This job description is a reflection of the present position and is subject to review and alteration in detail and emphasis in the light of future changes or development.

Clinical Trial Assistant (Industry Placement)

Candidate Information

Person specification

Education and Knowledge

Educated to GCSE level or equivalent including English and Maths	Essential
Educated to 'A' level or equivalent	Essential
Studying for 1st degree in life sciences	Essential
Office or computer skills qualification (e.g. GNVQ, CLAIT)	Desirable

Skills and Experience

Proven ability to work accurately with attention to detail	Essential
Good written and oral communication skills	Essential
High level of computer literacy	Essential
Proven ability to use Microsoft Office packages (Word, Excel)	Essential
Assertive and articulate with the ability to communicate effectively	Essential
Problem-solving skills	Essential
Ability to use electronic systems for recording and managing information	Essential
Ability to work to agreed deadlines	Essential
Ability to work as part of a team	Essential
Ability to adhere to written procedures	Essential
An interest in cancer research	Essential
Ability to work with confidential information	Essential

Benefits

We offer a fantastic working environment, great opportunities for career development and the chance to make a real difference to defeat cancer. We aim to recruit and develop the best – the most outstanding scientists and clinicians, and the most talented professional and administrative staff.

The annual leave entitlement for full time employees is 28 days per annum on joining.

Staff membership to the Universities Superannuation Scheme (USS) is available. The USS is a defined benefit scheme and provides a highly competitive pension scheme with robust benefits. The rate of contributions is determined by USS and details of the costs and benefits of this scheme can be found on their website. If staff are transferring from the NHS, they can opt to remain members of the NHS Pension Scheme.

We offer a range of family friendly benefits such as flexible working, a parents' group, and a maternity mentoring scheme. Other great benefits include interest free loans for discounted season tickets for travel and bicycle purchases, access to the NHS discounts website, a free and confidential Employee Assistance Programme which offers a range of well-being, financial and legal advice services, two staff restaurants, and access to a gym and sporting facilities at our Sutton site.
