

Principal Statistician Candidate Information

August 2025

The Institute of Cancer Research

About our organisation

We are one of the world's most influential cancer research institutes with an outstanding record of achievement dating back more than 100 years. drugs and developing precision radiotherapy. Together with our hospital partner, The Royal Marsden, we are rated in the top four centres for cancer research and treatment worldwide.

As well as being a world-class institute, we are a college of the University of London. We are consistently in the top performing universities in the league table of university research quality compiled from the Research Excellence Framework (REF 2014 & 2021). We have charitable status and rely on support from partner organisations, charities, donors and the general public.

We have more than 1000 staff and postgraduate students across three sites – in Chelsea and Sutton.

The Clinical Trials and Statistics Unit (ICR-CTSU)

Under the Directorship of Professor Emma Hall, the ICR-CTSU is an internationally recognised, methodologist-led academic clinical trials unit (CTU), with over 30 years' experience in the design, conduct and analysis of cancer clinical trials. ICR-CTSU receives programmatic core funding from Cancer Research UK and is a UK Clinical Research Collaborative Registered CTU.

ICR-CTSU translates cutting-edge science into quality clinical trials that can transform cancer care, by:

- Leading patient-centred trials of smarter, kinder therapies that treat cancer more precisely
- Transforming how we design and conduct trials with innovations in trial methodology
- Learning as much as we can with integrated translational research and data science
- Championing purposeful and inclusive patient and public involvement
- Embedding research to improve the sustainability of our trials
- Supporting interdisciplinary training to empower the next generation of trialists

Principal Statistician

Candidate Information

ICR-CTSU is a key part of the ICR/Royal Marsden Centre for Trials and Population Data Science. The Centre brings together expertise across the two institutions to advance methods-based and methodologist-led research to improve cancer research outcomes and quality.

ICR-CTSU's portfolio of national and international phase II and III trials covers a wide range of disease sites from common cancers (e.g. breast, prostate, lung) through to rarer malignancies (e.g. ovarian, testicular, penile). Our expertise in intervention assessment includes novel targeted drugs and immunotherapy, hormonal therapies and chemotherapy, radiotherapy (including advanced targeted technologies), drug-drug and drug-radiotherapy combinations, imaging technologies and diagnostics/companion diagnostics. Our cross-cutting Integrative Genomic Analysis team facilitates interrogation of the wealth of emerging trial data to further understand mechanisms of action and markers of treatment sensitivity or resistance and to translate novel diagnostic, prognostic and therapeutic strategies into clinically relevant biomarker-driven trial designs. Our Early Phase and Adaptive Trials team provide methodology leadership to an expanding number of early phase trials.

Recent publications highlighting the breadth and impact of our portfolio include:

- PACE: radiotherapy in five larger daily doses is as good as the standard 4-week therapy for patients with low/favourable intermediate risk prostate cancer ([New Engl J Med 2024](#)); the most recent of our long-standing portfolio of phase III radiotherapy trials to report practice changing results.
- plasmaMATCH: pioneering evidence to support the use of liquid biopsy ctDNA mutation detection to inform targeted treatment selection for breast cancer patients thus avoiding the need for invasive tumour biopsies ([Lancet Oncol 2020](#)).
- POUT: adjuvant chemotherapy improves outcomes for patients with upper tract urothelial cancer ([J Clin Oncol 2024](#))
- NICAM: a phase II study demonstrating activity of nilotinib in a rare form of melanoma with a mutation in the *KIT* gene ([Cell Rep Med 2024](#)).

Our methodology work includes the [DEFINE study](#) - SPIRIT and CONSORT extensions for early phase dose-finding trials – to enhance transparency and reproducibility for trial protocols and reports ([BMJ 2023](#); [BMJ 2023](#)), a review of clinical trial designs for evaluating and exploiting cancer evolution ([Canc Treat Rev 2023](#)) and use of routine collected data as an alternative to hospital based follow-up ([preprint](#)).

We are a multi-disciplinary CTU, with more than 90 staff including statisticians/methodologists, clinical trial programme management, trial management, data management, research IT programming and administrative support staff. We are based at ICR's Sutton site.

We have over 75 multi-centre trials in set up, open to recruitment, or in active or long-term follow-up. Our senior management team hold leadership roles shaping clinical research at the local, national and international level.

Principal Statistician Clinical Trials and Statistics Unit

Candidate Information

Job Description

Department / division:	Clinical Trials and Statistics Unit (ICR-CTSU), Division of Clinical Studies
Pay grade / staff group:	Principal Statistician (Staff Scientist)
Hours / duration:	Full time (35 hours per week), Monday to Friday. Fixed term contract for 3 years. This post is eligible for discretionary hybrid working.
Reports to:	ICR-CTSU Group Leader
Line management:	1 or more statistician/senior statisticians
Main purpose of the job:	Advise and have delegated responsibility for the statistical development, oversight and analysis of a number of early and/or late phase clinical trials

Role Summary:

The post-holder will have a key role in supporting ICR-CTSU Group Leaders in delivering the strategic research aims of the Unit. They will work as part of a multi-disciplinary team, providing statistical expertise and day-to-day leadership in the development, oversight and analysis of a number of clinical trials as well as associated translational research projects.

We seek an experienced and highly motivated statistician who enjoys the challenge of designing efficient clinical trials and analysing complex multi-modality datasets, and who is looking for opportunities to apply their statistical knowledge across multiple therapeutic areas in oncology. Effective oral and written communication skills, attention to detail, along with enthusiasm for collaborating with others from different disciplines, are essential.

Duties and responsibilities:

The post-holder will be a key academic staff member of the statistical team at ICR-CTSU. They will work with independence under the guidance of the ICR-CTSU Group Leader for Gynaecological Cancer Trials and Imaging studies, Dr Nuria Porta, and will be a member of the ICR-CTSU's Management Group.

Under the Group Leader's oversight, they will have delegated responsibility for, and make a significant contribution to, specific research on the associated challenges in the design and analysis of imaging studies (e.g. diagnostic accuracy, multi-reader studies, clustered/correlated data) and evaluation and translation of novel response endpoints and biomarkers into clinical trials. There is flexibility for the post-holder to pursue their own methodological interests where these align to ICR-CTSU strategy.

Specific duties and responsibilities will include some or all of the following either directly or via supervision of the Group Leader:

Principal Statistician Clinical Trials and Statistics Unit

Candidate Information

Duties and responsibilities

Initiation and Design of Clinical Trials

Provide high quality statistical input in design of phase 1 to phase 3 clinical trials and other prospective studies of technology/biomarker evaluation

Contribute to development and defining of the study question. This will often include a review of the available literature and analysis of data available from other sources

Contribute (as a co-applicant) to funding applications for specific clinical trials, trials methodology projects or data science projects

Develop the study protocol with Protocol Development Group, particularly the statistical considerations of sample size and analysis strategy

Contribute to the design of (electronic-) Case Report Forms and trial databases to ensure data are collected and stored to meet the requirements of statistical monitoring and analysis, and in line with relevant guidelines and legislation (e.g. Data Protection Act, EU Clinical Trials Directive, Research Governance Framework, ICH Statistical Principles for Clinical Trials, Good Clinical Practice)

Analysis and Management of Clinical Trials

Direct the work of the trial statistician (where applicable), overseeing the ongoing statistical input throughout the life of the trial

Liaise with the Clinical Trial Programme Manager to ensure delivery of research objectives within a trial

Review and/or develop statistical analysis plans ensuring compliance with relevant guidelines

Assist and advise the trial team on data collection and monitoring procedures to ensure completeness and correctness of data during both recruitment and follow-up phases of trials

Undertake central statistical monitoring of data to assist audit and quality control [or advise and support the trial statistician to conduct central statistical monitoring]

Review and/or contribute to the preparation of reports e.g. for Trial Management Group and Trial Steering Committee meetings or as required for regulatory/Sponsor oversight

Undertake interim analyses and produce reports for submission to the Independent Data Monitoring Committee / Safety Review Committee [or review such reports generated by the trial statistician]

Undertake final analyses and compilation of reports for presentation and publication [or review such reports generated by the trial statistician]

Contribute to manuscript writing

Undertake additional analyses, exploring novel methodologies as required

Liaise and work with multidisciplinary collaborators, to understand the biological background and technology/biomarker science for each analysis, and apply or modify the appropriate statistical methodology (e.g. modelling of clinical outcome data integrating complex biological data structures or clustered/correlated data)

Principal Statistician Clinical Trials and Statistics Unit

Candidate Information

Work with statistical colleagues to develop or modify statistical methodology as required for design and analysis challenges. This may include collaboration with others with similar interests (e.g. through the MRC-NIHR Trials Methodology Research Partnership or the UKCRC Registered Clinical Trials Units) to develop professional specialism.

Other duties

Contribute to ICR scientific output by drafting clinical trial and methodology abstracts and papers in conjunction with ICR-CTSU Group Leader, trial team and external Chief Investigators

Promote the work of ICR-CTSU by presenting research output at national/international symposia

Contribute to ICR clinical research governance committees & other initiatives as required (e.g. monthly review of research projects submitted to the ICR/Royal Marsden Hospital Committee for Clinical Research (sponsorship oversight committee))

Review and manage statistical resourcing requirements within trial teams and the wider ICR-CTSU, contributing to the Statistics Operations meetings

Contribute to meetings of ICR-CTSU statisticians, joint meetings of ICR-CTSU and Royal Marsden based statisticians and other relevant team research meetings

Provide occasional teaching lectures to ICR-CTSU staff, ICR students and other postgraduate courses run locally

Contribute to supervision of PhD students in an associate supervisor role as appropriate

Provide occasional consulting advice to clinical and scientific colleagues

Contribute to review and development of relevant standard operating procedures to promote best practice

Adhere to relevant standard operating procedures and work within the guidelines laid out by the ICR-CTSU Quality Management System

Contribute to wider clinical trials national "citizenship" e.g. through membership of Data Monitoring Committees, Trial Steering Committees and/or peer reviewing

Keep up to date with the related medical and statistical literature

General

All staff must ensure that they familiarise themselves with and adhere to any ICR policies that are relevant to their work and that all personal and sensitive personal data is treated with the utmost confidentiality and in line with the General Data Protection Regulations

Any other duties that are consistent with the nature and grade of the post that may be required

To work in accordance with the ICR's Values

To promote a safe, healthy and fair environment for people to work, where bullying and harassment will not be tolerated

Principal Statistician Clinical Trials and Statistics Unit

Candidate Information

Person specification

Education and knowledge

MSc in medical statistics/biostatistics or an allied field (e.g. public health, epidemiology, data science) with relevant work experience	Essential
PhD in medical statistics/biostatistics or an allied field	Desirable

A sound understanding of the concept of all phases of clinical trials	Essential
A good grasp of the scientific background to clinical trials	Essential
A good understanding of cancer biology and its treatment modalities	Desirable
Knowledge of Good Clinical Practice, the EU Clinical Trials Directive, Research Governance Framework, ICH Statistical Principles for Clinical Trials, and General Data Protection Regulation	Essential

Skills and qualities

A desire to apply existing and novel statistical methods to the requirements of a diverse range of statistical problems	Essential
Working knowledge of statistical software (e.g. STATA, R).	Essential
Excellent knowledge of PC based Windows and Microsoft Office software	Essential
Excellent written and spoken English	Essential
Effective oral and written communication skills. The post holder will be required to communicate statistical concepts and the scientific rationale for clinical trials to clinicians and other allied healthcare professionals	Essential
Excellent organisational and time management skills; ability to work to deadlines and organise and prioritise both personal and project workload	Essential
Ability to work accurately, with a strong attention to detail	Essential
Excellent interpersonal skills to facilitate liaison with colleagues and collaborators and leadership within a trial team	Essential
Capable of innovation and a research interest in statistical clinical trial or closely related methodology (e.g. early phase trial design, biomarker-driven designs, enrichment designs, analysis of quality of life data, methods for evaluating rapidly changing technologies, joint modelling of longitudinal and survival data, development and validation of clinical prediction models, multilevel modelling, evaluation of artificial intelligence/machine learning interventions).	Desirable

Principal Statistician

Clinical Trials and Statistics Unit

Candidate Information

Experience

Working as a clinical trials statistician within academia or the commercial sector	Essential
Applying statistical methods to real data	Essential
Handling and processing large datasets	Essential
Survival analysis methods	Essential
Sample size calculations	Essential
Analysis of clustered/correlated data, including longitudinal data sets	Essential
Design and/or analysis of (multi-reader) diagnostic accuracy studies	Desirable
Significant contribution to manuscript writing e.g. as key analytical statistician	Essential
Statistical and critical review of documents	Essential
Analysing biomarker or genetic/genomic data and associated clinical data.	Desirable
Statistical consulting	Desirable
Contribution to grant/funding applications	Desirable
Experience in SOP review/development	Desirable
Experience in line management, supervising or mentoring	Essential
Managing statistical resourcing requirements	Desirable
Experience in teaching or training statistical concepts to a non-statistical audience	Desirable
Experience as independent member in Data Monitoring Committees or Trial Steering Committees and/or in peer reviewing	Desirable

General

Ability to work independently and as part of a team	Essential
Ability to project a positive and professional image of the ICR-CTSU to both ICR and external collaborators	Essential
Ability to maintain adherence to written procedures and clinical and regulatory standards applicable to ICR-CTSU clinical trials	Essential
Experience of handling sensitive and confidential information	Desirable

Principal Statistician

Clinical Trials and Statistics Unit

Candidate Information

Our values

The ICR has a highly skilled and committed workforce, with a wide variety of roles, each requiring different skills. But whether you work as a researcher, or work as part of our corporate team, your work and behaviour is underpinned by these six values. They are what bring us together as one team - as 'One ICR'.

Pursuing excellence

We aspire to excellence in everything we do, and aim to be leaders in our field.

Acting with Integrity

We promote an open and honest environment that gives credit and acknowledges mistakes, so that our actions stand up to scrutiny.

Valuing all our people

We value the contribution of all our people, help them reach their full potential, and treat everyone with kindness and respect.

Working together

We collaborate with colleagues and partners to bring together different skills, resources and perspectives.

Leading innovation

We do things differently in ways that no one else has done before, and share the expertise and learning we gain.

Making a difference

We all play our part, doing a little bit more, a little bit better, to help improve the lives of people with cancer.

Our values set out how each of us at the ICR, works together to meet our mission – to make the discoveries that defeat cancer. They summarise our desired behaviours, attitudes and culture – how we value one another and how we take pride in the work we do, to deliver impact for people with cancer and their loved ones.”

Professor Kristian Helin
Chief Executive

Principal Statistician

Clinical Trials and Statistics Unit

Candidate Information

Benefits

We offer a fantastic working environment, great opportunities for career development and the chance to make a real difference to defeat cancer. We aim to recruit and develop the best – the most outstanding scientists and clinicians, and the most talented professional and administrative staff.

The annual leave entitlement for full time employees is 28 days per annum on joining. This will increase by a further day after 2 years' and 5 years' service.

Staff membership to the Universities Superannuation Scheme (USS) is available. The USS is a defined benefit scheme and provides a highly competitive pension scheme with robust benefits. The rate of contributions is determined by USS and details of the costs and benefits of this scheme can be found on their website. If staff are transferring from the NHS, they can opt to remain members of the NHS Pension Scheme.

We offer a range of family friendly benefits such as flexible working, a parents' group, and a maternity mentoring scheme. All positions at ICR-CTSU are eligible for discretionary hybrid working. Other great benefits include interest free loans for discounted season tickets for travel and bicycle purchases, access to the NHS discounts website, a free and confidential Employee Assistance Programme which offers a range of well-being, financial and legal advice services, two staff restaurants, and access to a gym and sporting facilities at our Sutton site.

Further information

For informal discussion about the role please contact Dr Nuria Porta, email: Nuria.Porta@icr.ac.uk. For general queries about the recruitment process, please contact ICR-CTSU, email: ctsu@icr.ac.uk.

This job description reflects the current position and is subject to review and alteration in detail and emphasis in the light of future changes or development.
